

## 9 gios

He's a cheater. Cheated on you, cheated on me, cheated on everybody. He's a great sales guy, absolutely.

He's a very good sales guy. But I was never able to fully trust him, not even now. I can't, no, of course, of course.

So, what did he say he wanted to buy the company now? Because he reached out to me. So did that guy, Brian Becker, also reached out to me recently. They believe it.

This is stupid. Okay. So, I wanted to know, so to dig out some information from him.

So, I'm talking to this guy and I said, like, before you make your call for the meeting by confirmation, blah, blah, blah, blah, by the way, what is the price of 33% of the company paid cash? You remember, right? So, he goes to buy 33% equity of Proto. I say, yes, I know two guys in Zouk. But do you really have granted IP? And he goes, we aren't selling that amount, but we are selling 10 million, 10 to 15 million at 80 million pre-money right now.

The series A was at 140. So, this is a big discount. A lot of garbage.

And then he goes, do you actually have granted IP? And he goes, like, yes. We have all North American patents on hardware issued and we have a lot of software pending. And to me, Arki, we have software pending.

It's bullshit. Well, that's what he claims. And then he goes to me that all North American IP, and to me it's like, what the fuck is worth North American IP outside North America? Nothing.

IP is around the world. If you have it in North America, well, that's okay. Stay home and play with dolls.

Don't go out to the big world because it's totally useless. Anyway, so I go like, I don't understand the equity prices, blah, blah, blah, blah. Just give me the price.

I'm off to Zouk. I'm meeting some people. And he goes to me, 10 million gets you roughly 11%.

This is no spam? Yeah. And that's what I'm telling me. It's in writing.

Can you send me that? Some screenshots. Is that WhatsApp? Yeah. You can send me the whole conversation.

You just save it, save as, top right. You know me, Arki. If I give you my conversation with you right now on this phone, I have back to 2021.

If I give you my conversation with Nazi. Oh my God. Give, save as, in the top right hand corner,

save as, send it to me.

And that guy's life is going to change instantly. But you don't want this phone. You want my UK phone.

No, no. WhatsApp. Send me your WhatsApp conversation.

Oh, why? The UK phone's got some. I don't even know. Let me check.

Top right hand corner, the three little, the little, these little buttons. No, I know. But Arki, the one with Nazi, I need to clean it up a little bit.

There is some stuff that is not work related. But you want to know how Beck was with David Nasman? Yeah. You really want to know? Yeah.

Can you see the number here? 2016. Wow. They used this against me once in litigation in London.

They tried. What did they say? The chat. Funny messages.

Talking about bullshit. They took it out of a contest. And said that they were here, that you were saying something.

Yeah. Look, look, you want to see logistic foils. Yeah.

You have all evidence on jobs, on everything. On this phone since 2016. 2016.

You were still booming, man. We were sick. Yeah.

And you were setting me up for them. No, he started, I tell you. You really want to know? Yeah.

In 2019. In 2019, he was writing to me. I feel like you are avoiding me.

He needed money or commission of some job that I needed. Whatever. And then he sent me a message.

Orlando. Yeah, because he didn't have the foil. So I had to send the foil to Orlando.

Because we did some transaction with Universal Studios. Where you didn't have the foil. Universal by contract.

Yeah, yeah, yeah. And then we bought it locally. I spent a lot of money.

Because Zerpl fucked up. Because Zerpl fucked up. But then they came to me.

I remember. Zerpl fucked up. And I had to pay.

I had to buy the foil. I sold the foil directly to Universal. Okay.

Because by contract. And I had to pay commission to Nazi. You know that, right? I didn't know that.

Well, now you know. So, anyway. This is the first test.

You see this one? Yeah. Well, when did you fire him? I don't know. I can't remember.

When I found out what they were doing. When I found out. They basically stole everything and left anyway.

I didn't fire anybody. I fired the whole company at one go. Because of all the lawsuits.

Around then. Around then. Around 2019, I think.

You think? I think so. Well, this one is 21st of August 2019. And so that's when he first took the commission outside of the business.

No, no, no, no, no, no. This one. In 20 August 19 was checking your email from Universal.

Let's go get some money. So, what we're going to about this? Oops. What did I say? They made the mess.

Not us. I was telling them, go fuck yourself, basically. He called me as well.

No worry. Money should arrive by Friday, I hope. I need the money.

Hey, last time we talked, you told me you were going to send me some leads. Help me out, brother. You want the leads for what? I don't remember.

Oh, he was working with a guy. Cave Girls. The audio on this is great.

Dave Peck. Wow, wow, wow. Christy Johnson.

This is the future of porn. Send me that. Send me the whole conversation.

Listen, I'm going to go to bed. I'm going to talk to you in the morning. Peace and love, baby.

It's been magical for me. I don't know what the fuck you're still doing. I'm going to bed.

Go to bed. Go to bed. If I need help, you help me.

Of course. I'm here for you, brother. I am here for you.

Thank you for tonight. It's been very instructive. God bless you.

Oh, by the way, that thing that you talk about green stuff and finance and whatever, can that be turned into real money? It is real money. It's more real than real money. And as much as it's... How much money do I have to pay back for it? You don't.

You don't. The way it's engineered is that it's not built like that. It's not a loan.

It's built to create wealth. So how can I make money out of this? You get a bank to finance it for you at a reasonable rate. Not a predatory rate.

And you actually get a bank to actually finance you. It's called risk management, right? So all these people... Yeah, I just got confirmed about... What's his name? The security guy.
