Hi Alki.

It looks like we are finally working toward the launch of FOTV in a HD format, however my engineering team is asking for updated technical specifications since the signal delivery method may have changed. Would you be able to provide that for us or give me the appropriate contact please? I've attached the form which you submitted to us back in June along with another blank copy for completion.

Thank you.

Teresa Cain

Sr. Program Manager

DISH Network Programming, Locals Operations

Dear Melisa

Please find attached the signal delivery details requested.

I did not include the OTA as we are a cable channel even though we get carriage on 10.2 in LA

Regards

Alki

Alki,

Will you please fill this out for HD for FOTV in LA?

Melisa

Teresa hi

We can deliver over IP. We can probably sort out a connection very fast as we can cross connect from just about anywhere. That would be the most desirable method of delivery.

Have copied in Nick our CTO

Hey Teresa,

we been working on the P2P delivery project to dish with the contacts you (am I right? :) gave us for like few months, they were quite slow but recently gave us some estimates. Ill touch base with them

what specs do you need? we will basically match the specs you want us to send, so I think you define required specs?

thanks!

Teresa - We can deliver over IP from our own Network in LA and several other cities we are connected to by fiber today. With a cross connect probably.

Where is your data center receiving IP feeds on the West coast?

Hey

I copied everyone on the thread where <Doug.Wooldridge@echostar.com> for few months was trying to make those p2p links, I told them to go ahead.

Hi.

That is great news. May I ask you to please place the details of that launch on the attached technical sheet and return it to my attention. EchoStar requires this information from DISH in order to start processing the work order.

Hey Teresa,

I remember we filed this doc with Alki a while ago already.
