

SWISSX SOIL RECOVERY SYSTEM

Altadena Deployment - USDA-Aligned Regenerative Solution

WHAT IT IS

SwissX delivers a lab-tested, carbon-rich soil recovery system made from processed marine biomass (sargassum), designed to restore damaged land and improve soil performance immediately.

WHAT YOU GET

- 1 deployment (~8,000 sq ft coverage)
- 3 x 55-gallon drums (sealed, palletized)
- Lab-verified, stabilized soil amendment
- Delivered Antigua → California

PRICING \$2,500 per deployment	USDA SUBSIDY NRCS EQIP / CSP aligned Estimated reimbursement: 50% - 75%
---------------------------------------------	--------------------------------------------------------------------------------------

Scenario	Cost
Full price	\$2,500
50% USDA	\$1,250
75% USDA	\$625

VERIFIED & SAFE

Tested by Dunbars Laboratory (Antigua). Non-hazardous, non-toxic, pathogen-safe. Suitable for agricultural soil application.

WHAT IT DOES

- Restores depleted soil
- Increases water retention
- Boosts microbial life
- Improves crop yield potential
- Adds long-term carbon stability

WHY SWISSX

10,500 tons verified biomass reserve (2025). Government acknowledgment (Antigua & Barbuda). Registry-backed production system. Scalable deployments.

RESTORE LAND. REDUCE COST. SCALE IMPACT.
